Notes of
Lectures on the practice
of physic - began Jan^y 4th
1788 in the University of
Pennsylvania. —
Began again Jan^y 7th 1789. —

+ It ~~was~~ may not be unwise to enquire
into the final cause of diseases. Why
is so much evil inflicted upon us?

Are not the evils to which we are ex-
posed from moral-political ^{& other natural} causes
such as heat-cold-tempests - Earth-
quakes - famine - & poverty sufficient
without the addition of bodily pain -
& disease? - And if death must be the
necessary & inevitable portion of all man-
-kind, why do ^{we} not descend into the grave
without ~~these~~ ^{the} instrumentality of so
much pain & distress? - I apprehend
good reasons may be given for
this part of the physical evil of the
World. 1 Diseases lead us to
the study of anatomy & the
knowledge of the ~~low~~ structure of the
human body in which we discover
infinite marks of the wisdom and

1
The Practice of Physic is that branch
of medicine which treats of the causes
& cure of diseases. —

A Disease is that condition of
the animal body in which the actions
are not performed at all, or per-
formed with difficulty. +

The causes of diseases are divided
into remote - predisposing - occasional
& proximate. 2 9th Cold or contusion
a remote cause of pleurosy. 2
plethora the predisposing cause of
Hæmoptoe. 3 violent exercise the
occasional cause of D. L. Trason
the proximate cause of pleura-
sy, & rupture of blood vessel of
Hæmoptoe. all links of one

Goodness of the supreme being. without
such ~~an~~ objects as the removal of
diseases or the preservation of health,
who would ever submit to the latter
- ~~some~~ task of dissecting dead bodies -
a business th is entered upon wth horror,
& rendered tolerable only by habit -
or necessity. 2 Diseases lead us to
study the works of nature in the
Vegetable - ^{Animal} Mineral - Kingdoms th without
them we should have no botanists
- chemists - or naturalists - these have
all been physicians - & the works of na-
- ture in these kingdoms - w^d have
been ² unknown - ¹ unexplored - &

undiscovered by the children of men.
3 Diseases furnish excellent opportunities for the
exercise & improv^{ment} of the ~~body~~ ^{mind} - mental powers.
4 There would have ~~no~~ but few
opportunities without diseases for
the exercise of that humanity &
clemency which is the perfec-
- tion of our natures, & which cause

chain - proximate the last link.

A Symptom is an apparent deviation from ordinary health, & is always obvious to the senses.

Symptoms are of three kinds
 1 Symptomata morbi. 2 Sympto-
 :mata causae, & 3 Symptomata
 Symptomatum. The first are
 symptoms of the proximate cause.
 The 2nd are symptoms of the re-
 :mote cause, the 3^d proceed from
 both, & are secondary. E.g. pain
 fever & cough are Symptomata
morbi. If coryza, or Angina
 attend, they are Symptomata
causae remote. The difficult
 respiration is a symptom of a

us to resemble the great father of
mercies. Hospitals & Dispensaries in-
clude a large portion of human
misery. If these were abolished, - ^{human} ~~but~~
^{virtue} ~~nations~~ would languish for want of
opportunities to display the celestial
& god like virtue of charity. ~~Diseases~~ ^{Diseases}
~~are necessary to impart a relish to~~
~~the slipping of health~~. ^{as} The painful
heats of summer & colds of winter are
necessary to ~~render~~ the temperature
of Spring delightful - ^{as} Darkness gives
all charms to light - ^{as} Deformity ^{renders} to
beauty captivating - ^{as} Evil ^{is} ~~is~~ ^{as}
necessary to lead to good & to ~~truth~~
error serves only to enhance the love
& charms of truth. ^{to} In like manner
Diseases are ^{by way of contrast} necessary to impart a
relish for health. & Diseases render
our passage out of the world less terri-
ble ~~but~~ to the sufferer - & less distress-
ing to

Symptom viz - of pain.

Diagnosis

Those symptoms which taken collectively form the distinction of diseases constitute the diagnosis.

E.g. acute pain - cough - high fever - & distinguish a pleurisy from a rheumatic pain in the side.

Prognosis

is a declaration of the issue of a disease taken from the state and degrees of the symptoms. arose from times when the office of priest & physician were united.

In acute diseases uncertain - in chronic more certain. The prognosis taken from pulse - urine - sweats - eye - face -

7th lastly
Survivors, & they by their physical
influence ^{upon the moral faculty they} improve human virtue
& happiness. — we learn from this
view of this subject. 1st The necessity —
dignity — and Usefulness of the profession
of Physic. 2nd That "all partial evil is
universal Good" All discord — harmo-
ny — when understood. — ~~Physicians~~ ^{Physicians} are
led by it — thro' natural & moral
Avenues to the great Source & Centre
of all wisdom & happiness. — ~~and~~ ^{They} ~~are~~
are in a peculiar manner the
priests who minister ^{at} ~~upon~~ the Altar
of the great temple of nature — ~~they~~ ^{they}
handle the furniture of this temple, &
like our first parent — ~~we~~ ^{they} give names
~~and we interpret the language~~
to every article in it. — ~~So~~ This view
of our profession sh^d excite us to
study to enlarge our qualifications
for it as well as to discharge all its
duties wth fidelity & Diligence. —

to delirium - State of mind &c. from
 the pulse deceitful - Cullen's Decla-
 -ration of on Solano. Great
 Caution & prudence in predicting
 the events of acute and most chronic
 diseases necessary. — See below.

+ Indications of Cure

founded on a knowledge of a
proximate cause. Eg: In cutting
 pleurisy - the first thing to be done is
 to remove Spasm on w^{ch} pain - fever
 & inflammation depend.

+ Diseases are Idiopathic, & Sympto-
matic. Eg: Angina, & Globus hysteri-
cus. ~~the latter~~ -

Diseases are natural, & Arti-
ficial. The 1st are chiefly fevers. 66,000
 out of an 100,000 in London

+ The effects of luxury - also of
arts-manufactures - & studious
pursessions.

time in London - now only 10,000 out
of 100,000. Tumors old age - casualties
from prisons & accidents the only
natural outlets of human life.

Artificial diseases the offspring of
civilization - as neuroses - very

numerous. Indications of cure +

Remedies are ^{page 4th} natural & artificial.

1 powers of nature what? Read

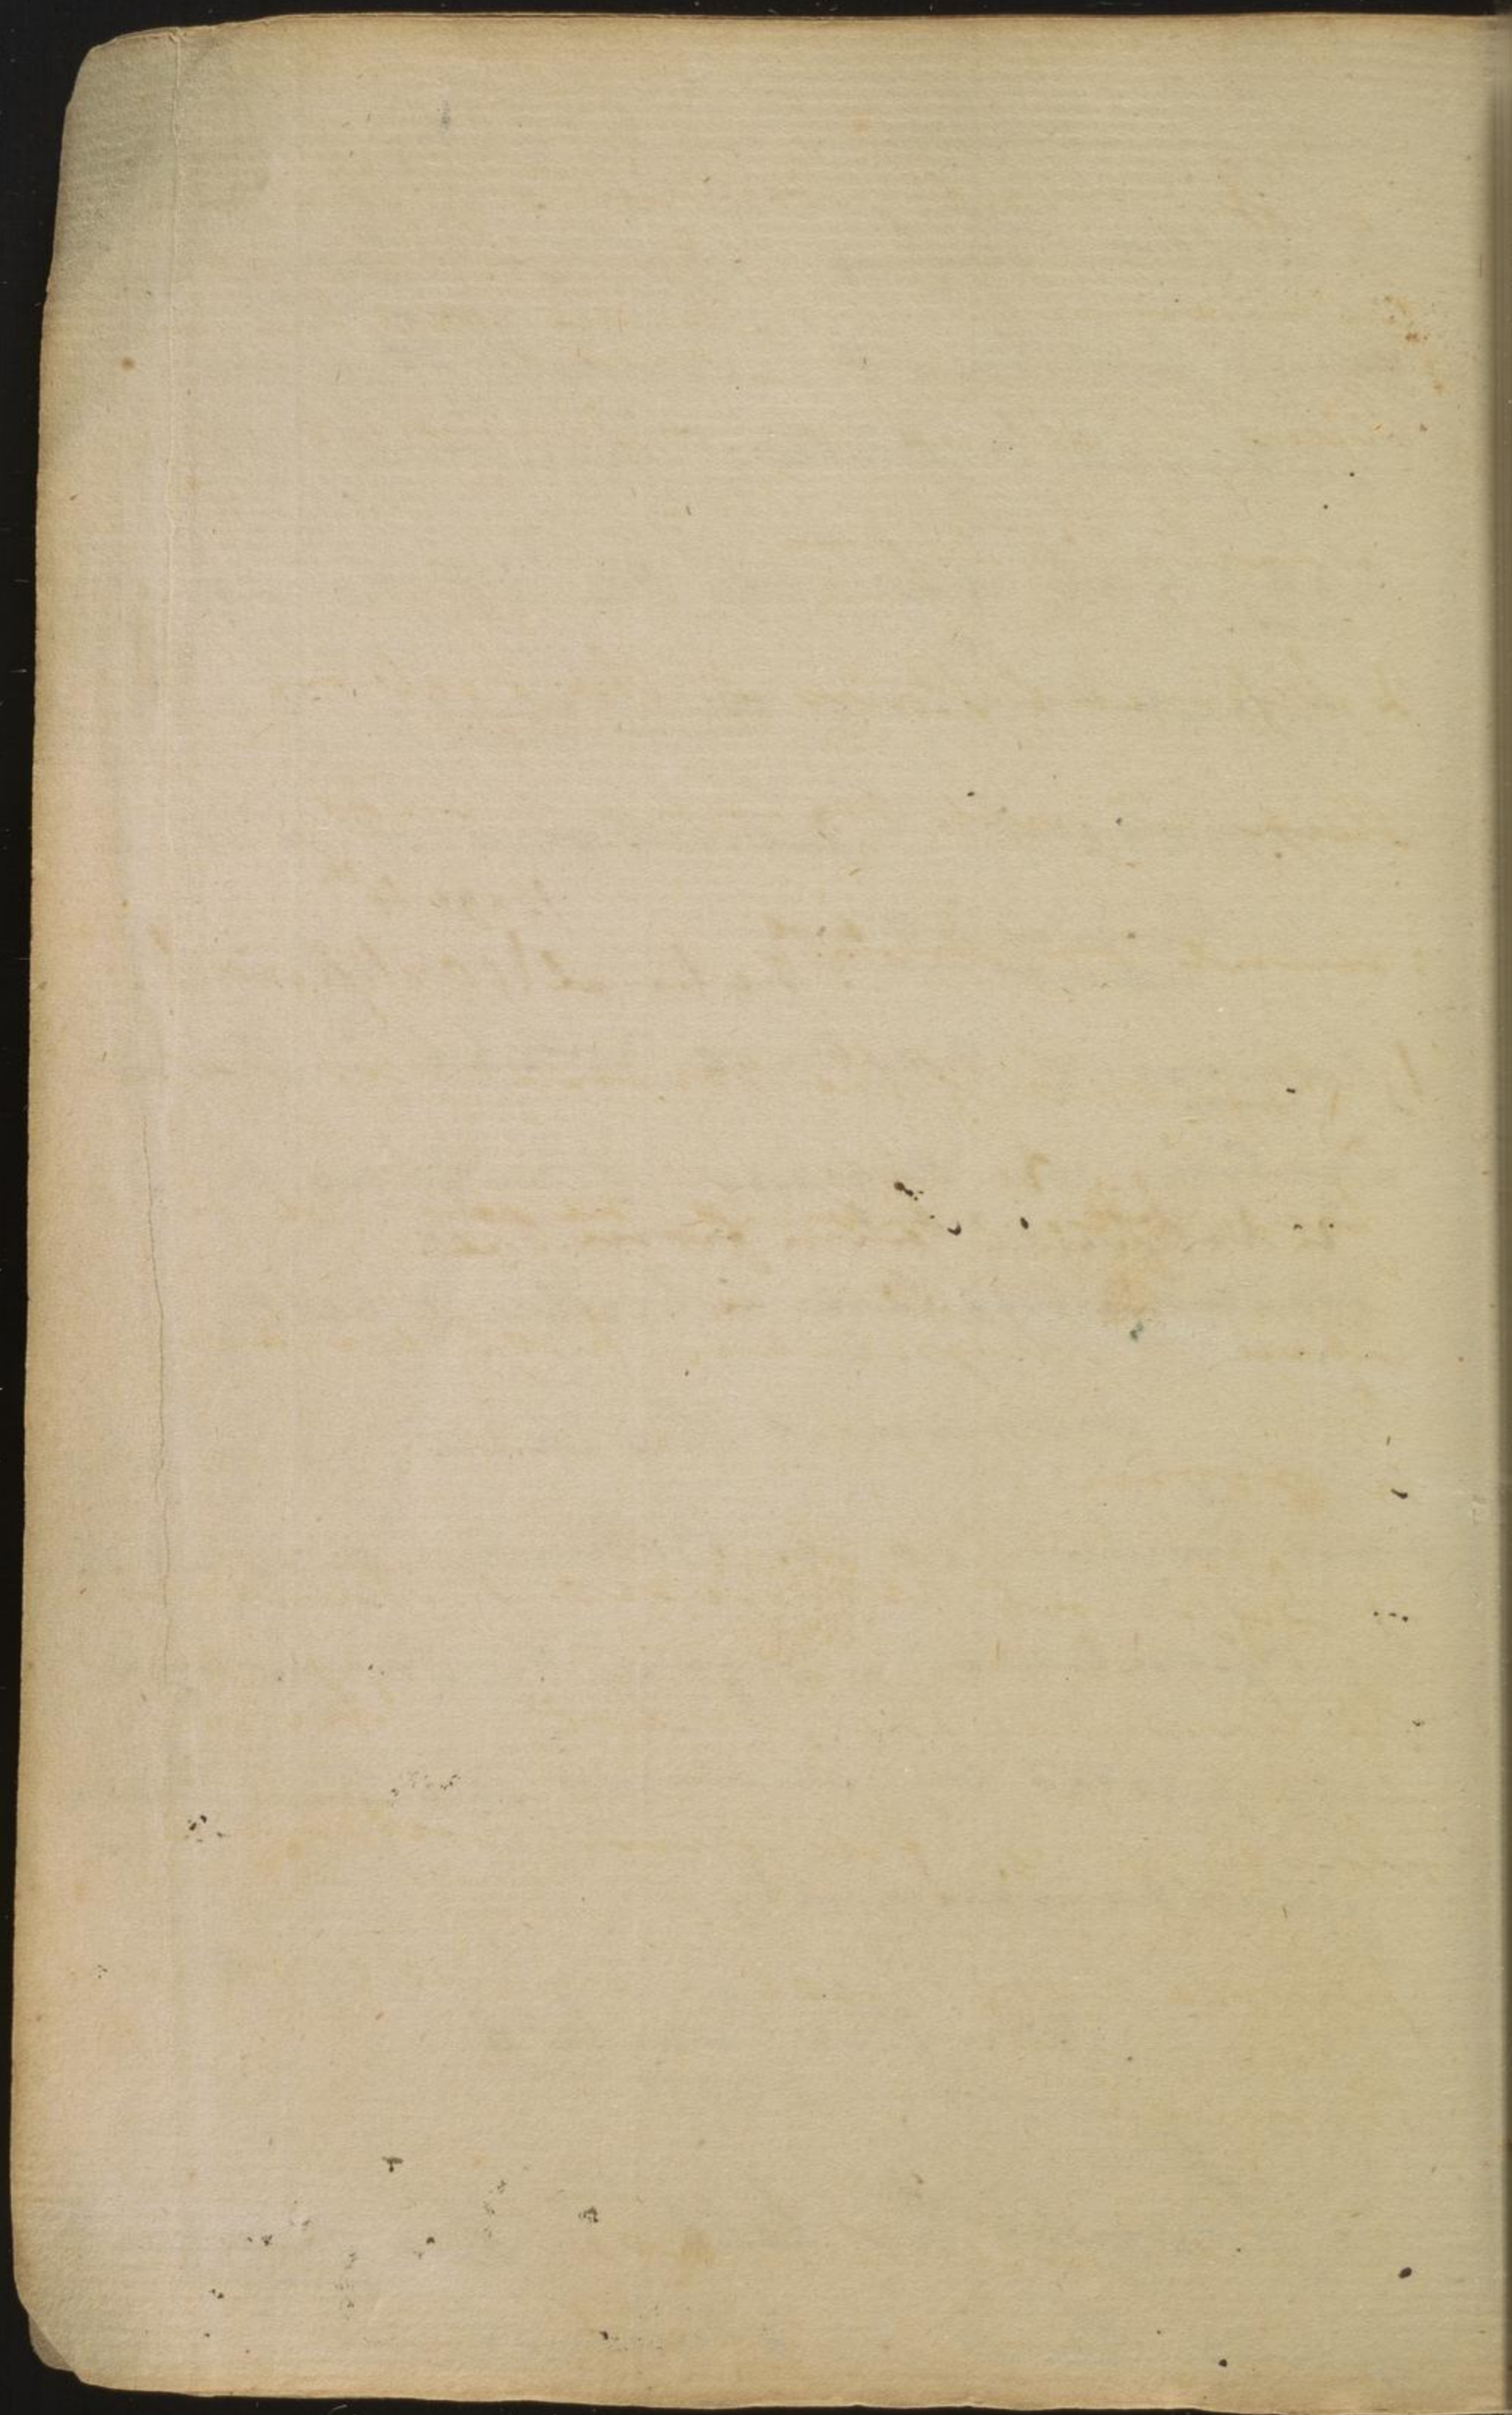

Oration on diseases of Indians p. 42

2 Artificial taken from the
Materia medica - Cullen's best.

Division of diseases necessary
and useful as in Botany. wished for
by Sydenham - began by Sauvage -
completed by Cullen's Shorten's study
- gives perspicuity -

On the pulse

1 Should be felt w. the fingers
- pulse there least perceptible.

2

in
the
for
the
5
h

2 Different positions of the body influence it - as lying on the back - sides - sitting up & standing - proximity to a fire -

2 Different States of the system as sleep - a full meal - kinds of aliment or drink

3 Passions of the mind - as hope fear &c. Should never be felt upon a physician first entering a room.

4 Different positions of the room influence the pulse - should always be free from perfume - ventilation best - fewest muscles then act

5 The State of Locomotion in a physician being different in

+ Pulse in old people seldom
quickened by an acute disease,
but more regular than ordinary.
Morgagni's remarks.

different postures of the body, he should always feel it ⁱⁿ the same. - Setting best - He will find an advantage in concentrating his sensations by commanding Silence - & even shutting his eyes - By the quiescence of one or more senses - the acting sense is rendered more distinct & vigorous.

6 pulse sh^d. be felt in both arms. Sometimes pulse on the Ulna - as in Jer: Baker - Jon: Lane - Major Lennox & Dr^o McClelland. +

got to p: 12

The pulse is said to be

- 1 Strong & { depending } ^{different} the strength of the contraction of the heart.
weak } on
- 2 full & { on the quantity of blood thrown out at each contraction.
small }
- 3 frequent & { on the number of
slow } contractions.
- 4 regular { on the regularity of the
irregular } action of the heart as to
intermittent } strength - quantity or fulness.

reaction. The cold fitt & Spasm part of
the virus natura medicatrix.

nervus - arterio - & fluids affected.
on the first - by Leucine - 2nd Stimulating
& 3rd Septic powers. hence nervous
inflammⁿ & putrid fever.

Remote causes

1 Marsh & human effluvia. The
first miasmata - the second contagion.
^{remarks on them}

1 peculiar to human species. Dogs
licked sores at marseilles without
taking the plague.

2 peculiar to ^{other} animals & not men.
Two cases in Ratty of both by catarrh

3 peculiar to descriptions of men.
as negroes don't take yellow fever

Draining. In Virginia negroes &
whites distinct diseases. The same

of Indians & whites at Nantucket
& Martha's Vineyard. +

x Does not this analogy extend thro'
all nature? mixture of heat & cold
produces inflammⁿ: - & of ~~hot~~ dry &
moist air, other diseases - equable weather
always healthy. -

+ It is remarkable that leaving an
impure & going into a pure air,
often occasions fever. Hence we wake
after lying in a foul air - when we
go out of it. Sea air - See Perival's fact.
mixture of airs hurtful. x

o Wm Coopers fact at Burlington.

b x by frost & heavy rains. Rainy
seasons always healthy. Short
Rutty & Winttingham

4 familiar to children & not adults.
It to children of different ages.

5 produced by heat & moisture -
no sickness when ponds - rivers &c
wholly overflowed. nor when
overflowed without heat succeeding.
as in meadows below Philad? -

6 produced by cutting down trees
between inhabitants & ponds or
rivers - hence their increase by
clearing & denudation by culti-
-vation as in Pennsylv^a & Connecticut⁺.

How destroyed?

1 By fires - Where ~~are~~ are they
animals - & have they wings?

2 By trees imbibing &c 3 by sulphur^{moderate}
or gun powder - 4 Vinegar 5 fish air.
6 Hungers - mad? & dying
generally common in Britain

* Jail fever known only in
British dominions - why?

perhaps more animal food eaten
there. white washing prevents it.

* plague unknown where
sugar is used in diet.

good color w. ^{the} fallen supercil: look
bad. ~~call~~
Ears - Deafness good & bad
2nd worst - Lind says rather good
+ Countenance - faces Hippocratica
- & face resembling ancestors.
"Hippoc. face." Sharp nose - hollow
eyes - fallen temples - cold, contracted
ears ^{the} w. the lobes inverted - skin of
the forehead hard - stretched & dry - whole
face pale - or black or livid - or
like lead" - but fatal - unless
cured by violent purging. -

than formerly owing to agriculture
 horticulture - ^{more sugar - & better} animal food -
 prepared. in cities - jails - see Howard
 more cleanliness - ~~to liberty~~ - more
 parts of
 common in America - owing to clearing
 increase of mill ponds - variable quantities
 of rain. ~~from~~ 2 cold. & 3 fear -
 hence most prevalent at first - hence physicians
 operate with other causes. All
 & minus escape them. Dead bodies no not infect with
 the plague - even factor from grave
Prognosis yards - gov. of Symma -
 from Howard. -

in water - Tamarinds &c. -

In 15

The cure of continued fevers =

The Indications are,

1 To moderate the ~~action~~ violence of reaction, which may be done, by

1 Diminishing the action of the heart & arteries,

a: avoiding or moderating those irritations which are almost constantly applied to the body; as a: The impressions made upon our senses, particularly,

a Increased heat, whether arising from

aa: External heat, ^(a) or,

BB. The accumulation of the heat of the body ^(b)

b The exercise of the body, (c.)

c The exercise of the mind, (d)

d The taking in of aliment, (e)

e Particular irritations arising from

a The sense of thirst, (f)

B Crudities, or corrupted humours, in the stomach

r The preternatural retention of feces,

191 Arterial tension depends
on 1 original tension 2 great
bracing powers as cold & exercise
3 Quantity & 4 Quality of Aliment.
5 focus in the alimentary canal.
6 State of the Uterus - most tension
in menstruation & pregnancy.

P.S. proper in all ages - in
infants as well as old men. I once
bled a child of 3 months old 3 times
in a phlebotomy. - 2 at all times
in women even during menstruation
3 In the arm. no revulsion - I go
not proper in the foot - further
improper ^{1st} Because it exposes to
more cold. 2 Cannot judge of the
quantity taken 3 cannot judge

S A General acrimony of the fluids.

B Employing certain sedative powers; as,

a. Cold.

b Refrigerants; the chief of which are,

a acids of all kinds,

B Neutral salts,

y Metallic salts.

c Diminishing the tension & tone of the arterial system, by

a: Blood-letting (g)

b: Purgings -

2 Taking off the spasm of the extreme
which are not relieved by bleeding.
vessels by -

a: Internal means; which are,

a Those remedies which determine to the surface, as -

a Diluents

a: Neutral salts.

y Sudorifics - between blankets

S. Emetics (h)

b. Those remedies named antispasmodics.

of the quality of the blood - because
blood flows in the water. 4 There is
danger of wounding a tendon of the
foot. 5 The system is too much dis-
turbed by it.

Blood sh? always be drawn plain
view, & in a recumbent posture
as fewest muscles act in that
position. Coagulable lymph
like a sand box & yellow serum
indicate great inflammation Diathesis.

^{Quick pulse suspected.}
1st Tarter Emetic -

(i) ^{proper in bilious Vomiting}
How act? as Antispasmodic-
evacuants - & in irritable habits as
Stimulants - Sh? lie on till they draw
& no longer - Muslin useful, &
diluting drinks to prevent Strangury.
caused by ad: Cabbage leaves offensive
early prophy - drawing not

Often necessary - Cutting off the
cuticle improves. Sh? be applied

17
B External means; as,

2 Blistering; f^{r}

b warm bathing. (k)

II

To remove the causes, or obviate the effects, of debility, by

Lying in bed -

1 Supporting & increasing the action of the heart and arteries - by

a Tonics, as - heat - fresh air
2 Cold - (l)

b Tonics medicines, which are either
Solid, as

aa Saccarum saturni, &c. or -

s Vegetable, as,

aa Peruvian Bark. (m)

B Stimulants, as, - n

a aromatics, &c. (o)

b wine.

(p) blisters - ^{opium &c} remarks &c.

Here bring in Febriacula called
intermittent, cured by Blisters.

2000 - too weak in the lower degrees of Deb.
- hence called extreme Unction by Dr Brown
when painful - poultices necessary.
(R) not often used.

(L) Cold - Dr. Keck's case - Persian
method &c -

(2m + n) - o) n + all Bleeful & of the
but sh^d be changed. &c
same class - Bush by Clyster -

leath - cataplasm - Dr. Broadbent's case.

& by the mouth - no regard to in-
termission - always proper on the

14 day. Sal Vol: - or Sal ammon Zi

Sal Tart Lys, mix Vol: vi - Opium -
Fothergill's Purgation -

wine - from 6i to 6iv in die

Silton's case - madira best -
poultices to the feet of garlic &c

nervous & putrid often connected -

& the above remedies more certainly
necessary in the latter case.

the ^{ch} kindling fire w: convey this up
the chimney. - (9) by opening windows &c - twigs of

willows - common salt wth 12 pound
on it - & by Vinegar -

(r) of the utmost consequence. dec:
ining mouth & tongue likewise.

(S - L) by Vomits - proper in the beginning
of all putrid fevers - often cures them

To obviate or correct the tendency of the fluids to putrefaction, by

I. Avoiding the application of putrid or putrescent matter, by-

A Removing the patient from places filled with corrupted air.

B Correcting the air from which he cannot be removed. (9)

C Avoiding the accumulation of the patient's own effluvia, by

a A constant ventilation,

b Frequently changing the bed cloaths and body linen. (10)

D Removing carefully and speedily all excremental matters.

E Avoiding animal food, or correcting it.

2 Evacuating the putrid or putrescent matter already present in the body, by (11)

A Evacuating frequently the intestines. (12)

in one day - In progress of debility sh?
be given cautiously - where great sickness
prevails may be given at any time
especially in Bilious fevers. A Vomiting
when troublesome cured by Blisters. Quinine &c
or 1 Bark & wine & Bitters - Porter
or, doubtful. -

(X) The convalescent state of putrid &
nervous fevers often dangerous -
Vomiting - Amnesia or
swelled legs - weakness - convulsions &c
follow - hair fall off - or turn grey -

Porter - Broussais's tincture -

Oysters - & Chocolate proper - moderation
in every thing from Excite? of the system. -

A Revolution in the case of fevers -
owing to Tart. Emet. Opium - wine
Bark &c -

a curious fact! putrid fe:
- vers in Russia & Sweden after
long & cold winters - D^r Foulche - &
Capt. Wulden - owing to Cold acting as
a sedative as well as heat. Its effects
of same as in on the complexion &c.

19
3 Supporting the excretions of perspiration and
urine, by -

a Diluents,

b Neutral Salts.

3 Correcting the putrid or putrescent matter
remaining in the body - by

A Diluents

B Antiseptics, &c,

C Fixed Air, &c,

4 Resisting farther putrefaction, or obviating
its effects. by -

Supporting the tone of the vessels, by

Tonic remedies.

are all putrid diseases from one origin
contagion. -
facts make it probable.

Means of preventing them

1 Vent - 2nd Rest - , Lymeria &

Ypshus sometimes alike In these
& many other diseases. Delay much!

Some Diseases like plants do not put
on y^r characteristic marks for some days

Sprain -

Bur: tar & V a p a:
to the part affected. -

+ To open them: 1 knife. 2 Canstic
3 honey-egg & flour.

Holding the burnt part
in Run removes pain, &
prevents a blister as in Surg.ⁿ
warmer's case.

Phlegmasia

Three causes of pain: 1. accumulation
2. distension of ^{2d} space - last cause of
Inflammation - see Cullen.

§: vii Phlogosis - Three terminations
resolution - suppuration - & gangrene &c.
1st: 2 purges - 3 reg: diet & cold
5 lead water - If these fail - then
air - Emollient & Stimulating
poultices as Lye &c. + lead water

In Paronychia - opening thro' series:
- turn - or afterwards excision of the
affected joint.

Anthrax - usually the back -
Bark proper - -

Burns - Antiphlogistics - Lead
water - Ointment ^{or white lead} is Copper th - sedatives
- scraped potatoes - molasses &c too
Stimulating - soft poultices best
by Dr. Mayne
- Lime Soil commended & failed in
London hospital - succeeded in ^{Donaldson's} family.

cold so great ~~as~~ as to prevent
reaction.

(a) Decoction of white oak leaves,
or a water distilled from them.
capt: walden.

From Cold. To prevent ^{it} cataplasms
 of Snow - or plunging in cold water
 & frictions - ~~is~~ avoiding fire -
 when formed the usual remedies of
 inflammation & gangrene. —

Supp. Gangrene & Abscesses - incision -
 Barks &c - mortified toes in old people
 cured by Opium - acts as a tonic -

Ophthalmia

cure

1. U.S. topical - leeches & cupping
2. purges 3. Blisters behind the ears, &
 on the temples. Dr. Noble Jones's case.
4. ^{Vegetable &} metallic tonics - ^(a) Lead water, and
 friction. 5. Electricity. 6. a dark room
7. Ung^t & Laps: Cal: made in fresh
 butter. 8. avoiding hicory fire -
 9. Where scrupulous - Veni:
 or intern: - the remedies proper for
 each #. Opium - useful when every
 thing has failed. - Campbell.

Ear Ach

cured by smoke of Sugar thrown
on burning coals conveyed thro' a
funnel into the ear. —

+ Contusions on the head
connected wth this disorder. L'Drum's
remark of fracture. D^r Jones's case.
Hanswieten's of tile of house. Blister
useful — same as phrenitis Brinkhart
& In^o Kushi's cases. — Consequences of
falls & contusion - 1 Coma - Delirium
2 Idiocy - falls from pulling a
Chair away. 3 Death - fall on his
foot by a soldier. Cold applications
useful in Puerperia for contus-
ions of the head.

22 } increased ^{the} pain in
Phrenitis. } the side. Spitting
 } blood - indicates mania
 } Sputatores. Hippoc:

1 Uter: general & topical

2 purges - 3 Shaving the head &
applying cold vinegar or water
to it 4 Blisters. 5 cold air
6 erect posture - Opium hurtful.

Idiopathic most common.

Cynancha trachealis

called Croup - by Hoene

Angina polyposa - inichaulis suffocatione

Stridula - monroe - angina suffocativa - Bard

Hives - from heaves - Bowels ~~hives~~ or heaves

Disputes abt: class it belongs to - Is it inflamⁿ?

not often - fever what little attends generally

typhus mitior - sometimes is attended wth inflamⁿ

symptoms. Dr. Monroe places it among Episcchesis

Excrucientium suppessiones - Perhaps it belongs

to three classes - monroe - Phlegmasia & spasmic

a second dispute - is it from spasm - or effusion

in the trachea - from both - This species two varieties ^{typ}

1 Spasmodica & 2 Humoralis ^{or catarrhalis}

I have long thought so - The idea lately adopted by Dr. Johnston

I prove it from dissection.

The spasmodic known -

1 By coming on suddenly, especially after first

sleep in the night. 2 going off suddenly. 3 yielding

to antispasmodic - as ~~warm~~ warm bath -

4 coming on periodically - especially at night

Cure-

1 Bleeding the infant May 1840

+ Some children, & even families subject to it.

Cure

1 Bleeding if in inflamⁿ season or constⁿ
or symptoms. 2^d Emetics. 3 antispasmodics
as warm bath - opium & asafetida Blisters
& 4 stimulating Cataplasms to the feet. -

Humoralis or Catarrhalis.

The cough or barking the same as in spasmodic
but 1 it comes on gradually two or three days
2 goes off the same - appears in malign^{ty}
- Scarlatina - measles & smallpox.
3 continues with uniformity.
4 Does not yield to antispasmodic medicines

Cure

1 Emetics 2 Calomel. Both act in the same way
3 Bleeding if Phlegon^a. 4 Blisters. This disorder
among adults, & hoarseness & barking continue
after danger Cynanche Pharyngea
is over. +

The same as tracheialis, & requires
the same treatment especially blisters.

Lynanche parotidea

Apt to fall in the testicles in men,
 according to an Italian writer,
 & breasts in women & glands apt to
 suppurate in children. Hippocr:
 describes an Epidemic in ^{the} the swelling fell into
 the testicles. it ~~was~~ ^{the} was the mumps.
 1 purges - 2 Disruptant liniments.

Pneumonia

Pain in shoulder & near the kidneys
 also back. See Cullen & Astruc
 Notha - Apoplexy of the lungs.

Cure

- 1 West ad 66. in pherson's case.
 middle sized man has 650 of blood & 650 of
 2 transcuting diaphoretic & Seneka.
 1 of which are red Globules.

 in the Urinary Organs.

Cure of Notha

Copious Bleed.

Deception of a physician often in Phthisis.
Frequent cough - May turn - Spitting
of blood & Dyspnea - both concealed from
me. -

Phthisis from debility. Debility
produces it in dying persons called
Rattles - in old people - Catarrh
Similis - ^{new: & daily fever. n. d. d.} - in - & Consump: is
from gen^l. weakness - Alters the
Objects of the faith & fear of Physicians
the consequence - not cause.
Alters

Crisis from grief - are the effect
not the cause. Trees don't grow there
^{from ex. or defect of soil.}

Sea Air stimulating from salt
- badish unhealthy from w² of
stimulus in air. Galen's patients
sent to Stabie where the Air of the
had the ^{4th} Air of Vesuvius
cured from ^{or} stimulus. Licia
a pine country - formerly season
- mended for the same reason.
warm Air does good by its stimulus.

Carditis.

See, Cullen! - I have never seen it

Peritonitis.

Ditto —

Gastritis

^{Drinks}

From cold ~~water~~ ^{drinks}. Three circumstances must concur. 1 extreme heat in the body. 2 coldness in the liquor, & 3^{ly} a large quantity must be drank. —

Symptoms — weakness — giddiness — ~~fever~~ in the stomach — ~~fric~~. Spasms clonic & tonic — death. —

Cure

1. Lig. land: in large doses — vomits & bleeding hurtful. — After violent symptoms abate gastritis comes on.
Cure 1 V.S. 2 Phlyctens - 3 Blisters
 4 diluted acids - 5 demulcents &c.

Enteritis

The same as Gastritis

From July 1st 1758 to July 1. 1760
out of 1743 patients 360 consumed^m
in $\frac{1}{4}$ of whom owing to falls - bruises
strains &c which gave no uneasiness
for 2 years - produced ^{general} debility which
ended in suppuration & death

HepatitisLiver subject to diseasesacute & chronic - slow, or latent
in warm climates. Balfour.inflammation often discovered by
gangrene & supuration after death,
in parts where no pain attended.- pulse only indicates it - sh? be
chiefly attended to. I have often pro-nounced an internal inflammⁿ tobe present from the pulse several
days before it showed itself. This is newlaw in the dys^{tem} - pain from stone
in the bladder ~~is~~ is felt first in

the glans penis. Vomiting first

indicates the presence of a stone, or a

disease in the kidneys. Baglivi's

fact of a stone in the opposite kidney
where the pain had been felt.It is that the chronic affects
the parenchyma, while
the acute affects the membrane.

§ One drop of blood from the
nostril taken notice off by
Hippocrates - shows the connection
between the nose & liver. —

+ Op used in East Indies - ~~inter~~.

~~is always fatal there~~. Wm.

Miller relieved by ʒss of ʒointm.
proper in ʒulseq. pain.

¶ Dry hot air in Madras produced
same pains in the bones as evening
dews, & probably from ʒ same
cause. — proper only after W. ind.

+ But more generally fatal. Which
= man & Clem. Smith's cases. always
fatal in the East Indies. Capt. Bell.
gives off with green stools in
some cases. —

○ This true in Mrs. Parson & Mrs. Eggar's
cases - both very acute. Blood fiery esp.
= ter 5 bleedings in neither - the last
comp^d of acute pain in the head esp.
the ~~last~~ ^{front} - cried & lifted her hands to it
as in hydrocephalus internus. — had
several fits - was delirious. —

parts of the liver. — coldness in the
nose — in Mrs Mosely's case. &

Pain sometimes on the left
as well as the right. — Often comes
on with symptoms of Colic & Dysentery.
The disease very common in
warm climates — and more
frequent in all, than is often
suspected.

Cure

1 Bleeding. 2 Calomel in large
doses & opium +
how does it act? 3 Blisters

— If Abscess comes on 4 Vomits —
Mrs Moffatt's case — or the knife
when it appears external. —

Splenitis

See Cullen.

Nephritis

The symptomatic most common.

Cure

1 U.S. — 2 diuretic purges & Glysters
3 Demulcent Drinks. 4 Anodynes.
5 Soft applications to the back. —

X Mrs Archer & her Bⁿ
affected by this disorder from
eating apples.

Cystitis

Alarming & distressing disease.

Two instances from injections
One in Philad^a - the other in Edin^g
under Dr Cullen - both fatal. -

I have seen two cases which I
attended wth Dr J Bond - both cured by
copious bleeding. Dr Bond remarks.
- blood very siry. little or no
fever attends - the pulse - blood -
& pain be sh^d guide us. -

cure as the last.

Rheumatismus.

ORDO III. Exanthemata

Varicella - moved by motion
 propagated by smoke - up chimney
 variety in the number of days in
 sickness from 8 to 20th - in eruption
 & in the burning of the pox. see Syden-
 ham on the variol. fever. —
 - Can it be extirpated as proposed by
 Hillary & Boerhaave? I have often
 mitigated it by large doses of Tart. Emet.
 & Calomel given during the eruptive fever.

The fever is either Synocha - Synochus
 or Typhus, and must be treated accor-
 -dingly. —

Death often bro't on by Dyspnoea
 from inflammatory viscid mucus &c in
 the lungs & trachea during the 2^d fever.
 - It may be prevented by giving
 Calomel for us to excite a salivation
 just before during this stage of the
 disorder. - highly useful in this disorder &
 variol. fever of Sydenham 141
 Serpiger Sh: be given likewise
 in this stage of the disorder, &

+ & a dull lancet by exciting too
much
inflammⁿ: throws out the infection

a revulsion from the breast cut
by emollient cataplasms to y^e hands
& feet, & by Blisters. —

To prevent pitted - the pustles sh^d
be opened on the face.

Purges sh^d be given after all the
pusk fall off - - Infection not de-
stroyed by fire - cloaths sh^d be
burned - Prostitution

See Cullen & pamphlet de.
I have only to add to it - y^e a deep
or large puncture often prevents
infection by too much blood following
which washes it away - also that matter
from a pustule on y^e arm of a child
infects - supposing the child is not infected.
Heberle

Vegetable & milk diet - an excellent
preparative.

The pneumonia & catarrh to be
treated by V.S. - Opriates - Demul-
-cents & blisters.

After ^{an} experiment, I am sure
a moderately warm regimen

is most proper in this disease,
owing to inflamed state of the lungs.

To prevent phthisis afterwards
with a vegetable diet necessary.

Purging improper afterwards
as in all diseases of the lungs. The
determination should be kept up to
the skin by warm air - flannel &c.

Is there any advantage from
Inoculating for this disease? - No
- sore soon very common.

Scarlatina

It is distinct from laryngeal ma:
- ligna. I have once seen it epide:
- mic without sore throat in 1763-4.

I frequently without it within
these 3 or 4 years. - The sore throat
is ~~not~~ symptomatic - ~~the~~ It occurs
in the typhus according to Monro.
I have seen it in the army & bubas.

+ Blisters useful - contrary
to Wehnering - Bark hurtful
agreeable to D^o. - may not all
putrid diseases like the human
Species have been originally One,
& diversified by Climate & State of
Society. It differs from maligna
in the color of the Skin being more
red - & the Skin itself more smooth.

Perkins.
The Scarlatina is a compound of
Atheria & Themia. The maligna only
the latter. - hence Bark improper.

It is true we sometimes find it attended with some ^{of all} of the symptoms of maligna - But we find instances too of maligna - having all the symptoms of inflamm: angina & yet who would call it by that name?

For the history & cure of this disease see written acc: - +

Pestis

Unknown in British Dominions for a century - owing to the use of sugar - wine & vegetables...

Not propagated to a great distance nor by contact, without the medium of ~~linen~~ cloths. Naked dead bodies handled with safety.

Spices & Sues often prevent it - also washing the hands & face w: Vinegar.

See a Sadler's acc^t of it in the reign of Chas II - and in Marseilles 1724.

& Howard's late work. Loss of memory as in Typhus follows it according

to Thucydides - Birds & beasts who
eat the flesh of persons who died
with the plague died of it. all
religion & obed: to the laws suspended
- being to good & bad dying, & none
expecting to live to be punished,
according to D^r. Very diff^r in
London among X^{ms} - all fled
to the churches &c according to Sadler.

rice water &c - & Diet - Veg: if black

capt: gadsden's case cured by straw berries -

Stools, & animal - if green stools attend.

Exercise - especially a Sea Voyage

10 Two cases cured by Rumour coming on

11 V.S. Sydenham in who calls Dysent.

12 years standing. Hysteria

1 Affects women more than men.

single - more ^{than} married. -

2 accomps: w: Globus hystericus - often

confounded w: Epilepsy - distinguished by

no foaming at the mouth as in epi.

- leptic fits. -

Cure

The same as Epilepsy - above all
exercise. Abstracting ^{strong} tea. Sops &c
and fixing the mind on some one

Hiccup - cured by sneezing
Hippocrates

+ Mr Babington in the 1st vol.
of med. communications gives
an acc^t of a case evidently made
worse by V.S. - By dissection no
morbid appearances. Is it not
therefore a disease of the ^{& from debility?} whole system?

Dr Astruc relates 4 cases of Spontani:
= one Hydrophobia - 1st from chagrin by
a flogging - the others from fatigue by
walking - His cure is ☞ - torries
keeping the wound open - & a potenti:
= al caustic. - see essays Dr Haysgarth
recommends Ab^solution for two or 3rd
hours with water. acts perhaps by excitⁿ inflame

Objct - the rebellion in 1745 in Scotland
checked hysteria. The death of a husband
& a child - and true religion have often
had this effect. —

Hydrophobia

May it not be from the same cause
as tetanus? Dr Lothergill's fact of the

running sore in the girl from the bite
sent from Vanswieten Vol. p 198 of the same
a cat - The fact from Italy. a stray dog
kind -

bit by a viper - his head swelled & in-
flamed - w. cured him. May not

the same remedies succeed as in
Tetanus? - I certainly would

try them. Is W. proper? no & +

he said ^{as says}

Ursaria

Diseases of the mind very important.

Mind & body act on each other.

The usefulness of metaphysics in

medicine. —

Powers of the Mind.

Composed - will - understanding -

opinions - moral faculty & conscience.

all but one soul. compared to ^{the British} ~~legislation~~.

Government - will - king - or executive - 2:

Lords - wisdom - 3: commons - ^{troublesome} freedom -

4 & 5 The judicial powers; - hence - they say

good gov^t only in a ~~proper~~ collective body resom:
= bring the individual

+ "Hic jant - felix memoria

" In expectatione judicii. -

Amentia +

Connected with softness of the brain,
 while great understanding & madness,
 with solidity. - This disease not beyond
 the reach of medicine. If faculties im-
 paired by medicine (as Stramonium) -
 why not improved by it? Storck's facts.

Different degrees of fatuity, as of
 loss of judgement, - ^{or} ~~and~~ memory - ^{or} moral
 faculty - or all - in which consist
 its most melancholly degrees.

Congenitacure

1 Cold Bath. 2 exercise - 3 tonics. -
 4 Accidents affecting the body which rouse
 the brain into action - as Dr Priestly's
 child of 4 or 5 years old cured by a
 fall which bruised its head, and
 Dr Monroe's daughter cured by
 a burn. - both idiots. Dr Leland's
 case.

Sally - lost her reason &c.
+ Wm Fennent at 19 years of age
in a supposed trance lost his
memory - began to learn over
again - while learning suddenly
all came to him again.

Senilis

This species more common among
 the ignorant, than the studious and
 literary - more common among the
 country people who when they are
 unable to work, have nothing to em-
 -ploy their minds, than among citi-
 -zens. Dr Johnson's part of Dr Swift.
 lost his intellects from his Avarice,
 which prevented his seeing company,
 & from having made a Vow never to
 use Spectacles by which means he
 lost the opportunities of renovating
 old, or acquiring new ideas. Business,
 & books & society - then ^{are} the best
 preservatives from this species
 of fatuity. Anthon's Benet's consolations
 - them from ^{loss of memory.}
Acquisita

Frequent after fevers, cured by
 cold bath & exercise. Deland's case
 Dr Siltor - Mrs Dunlap - Miss Rhea's 9 years old.

When does it begin in children? Dr
Moyse remem^r? a Cow & a plaid - lost his
sight at 18 months. See Shakespeare's tempest

p: 10 Prospero's speech to Miranda his daug^r
who tells her y^e she came into y^e enchanted Is-
land at 3 years old

" By what? By any other house or person?

" of anything, the image tell me, hath kept that

" hath kept with thy remembrance.

+ a ^{I remember small boy - 3 years old at the time} wonderful power of recollecting

past events - The deity the same
power guided future -

+ very low in savages - Their
mode of retaining speeches in
their treaties - ^{council} on ~~council~~ fires.

these
may not exist in the memory a pre-

- cursor or instinctive principle w^h serves
the same purposes as
~~is analogous to~~ taste does to judgement,

& the moral faculty does to conscience.

In visiting my patients, if I try to
recollect y^e ^{on} I can always tell when
I ^{am} forgetting any one of them by

a tumultuaria - very common -
hence perhaps the Spanish custom
of not admitting a man convicted of
drunkenness as a witness in Court.

a pathemate - all violent passions
weaken the memory especially grief.

~~Exercise~~ On the memory - Dr Reid's

remark on it: + ≠ x .

Different species . 1 for words as in
childhood - and among players . 2 Names
as Cyrus - mithridates . 3 numbers - as

Jed: Burston the ditcher - & Old Isaac Jones &
Jas Logan - see other side -

4 Ideas . The perfection of memory con-
sists in perceiving all four . But most men

want one or more of them . Dr Ribet's

no memory for numbers . Dr Lardner's

names - Lardner forgot the
name of his father in law . -

Mr Davis - none for words . memory

first fails for words . then names .

It is impaired by 1 intemperance in
eating & drinking 2 Dissipate evening .

a feeling which seems to draw me
to the places where they live. Mr. Will
was once ^{or disgusted} distressed at seeing Cha. Biddle
lame
put on a chair without recollecting
for a great while ^{that} the cause of this dis-
-grace was he had once seen Genl.
Arnold ~~by~~ whose name he detested set
with his foot in the same position.

The long dormant, or forgotten facts
are often ^{or latent} brought to light by association.
show a secret memory. -

Dr. Franklin May 26. 1789 informed me
that old James Logan by a stroke of palsy lost
his memory for the names of all his friends,
but used to call them by their ages, ^{he} ~~which~~
previously learnt. He would point to
books in his library, & tell when they were
printed & the sum they cost. To all ^{words} ~~subjects~~
except to ~~remember~~ ^{or unimpaired} ~~cones~~ his memory was
totally lost. Mr. Bondinot, ^{case} ~~case~~ ^{vol.} 4.

Mr. Carey informed me y: he could
never remember the difference between
King & jing ~~and~~ cannot how to wind up a
watch. - Dr. Hodge Dat. & all: plural alike.

Strong drinks - grief - palsy.

3 fevers. 4 lesions of the brain

5 snuff - as in Dr. Pringles case.

Dr. Hoffman - committed too

It is improved, by avoiding all
much to memory - Ziffer p 302 Vol 2

The above occasional causes. 2 By close

Words fatigue & mind - more & ideas. -
Attention. - old men never forget where

they bury their money. 3 By calling in the
aid of two senses where they can be obtained

especially eyes & ears. Dr. Watts' ad.

vice to remember anecdotes - the practice

of children & the vulgar to read out - to

whereby their ears & eyes are affected at

once by ideas. 4 by cold weather - Mil-

ton's case. 5 Apportion - ^(a) with figure

attitude &c of the speaker, (b) with plea-

sure - as fine voice - or agreeable pro-

nunciation of speaker or (c) with pain

- the practice of whipping boys at

land marks - & the facility with which

women remember all events con-

nected with childbirth - every woman

can. Abenianath. also place Dr. Clark's rule

8. + Repetition like attention
helps memory - even a lie by rep.ⁿ
is believed - hence Prospero says to Miranda,
+ his brother
"made such a firm of his memory
as to "credit his own eye ———"

Woman at the hospital knew
me by my mother.

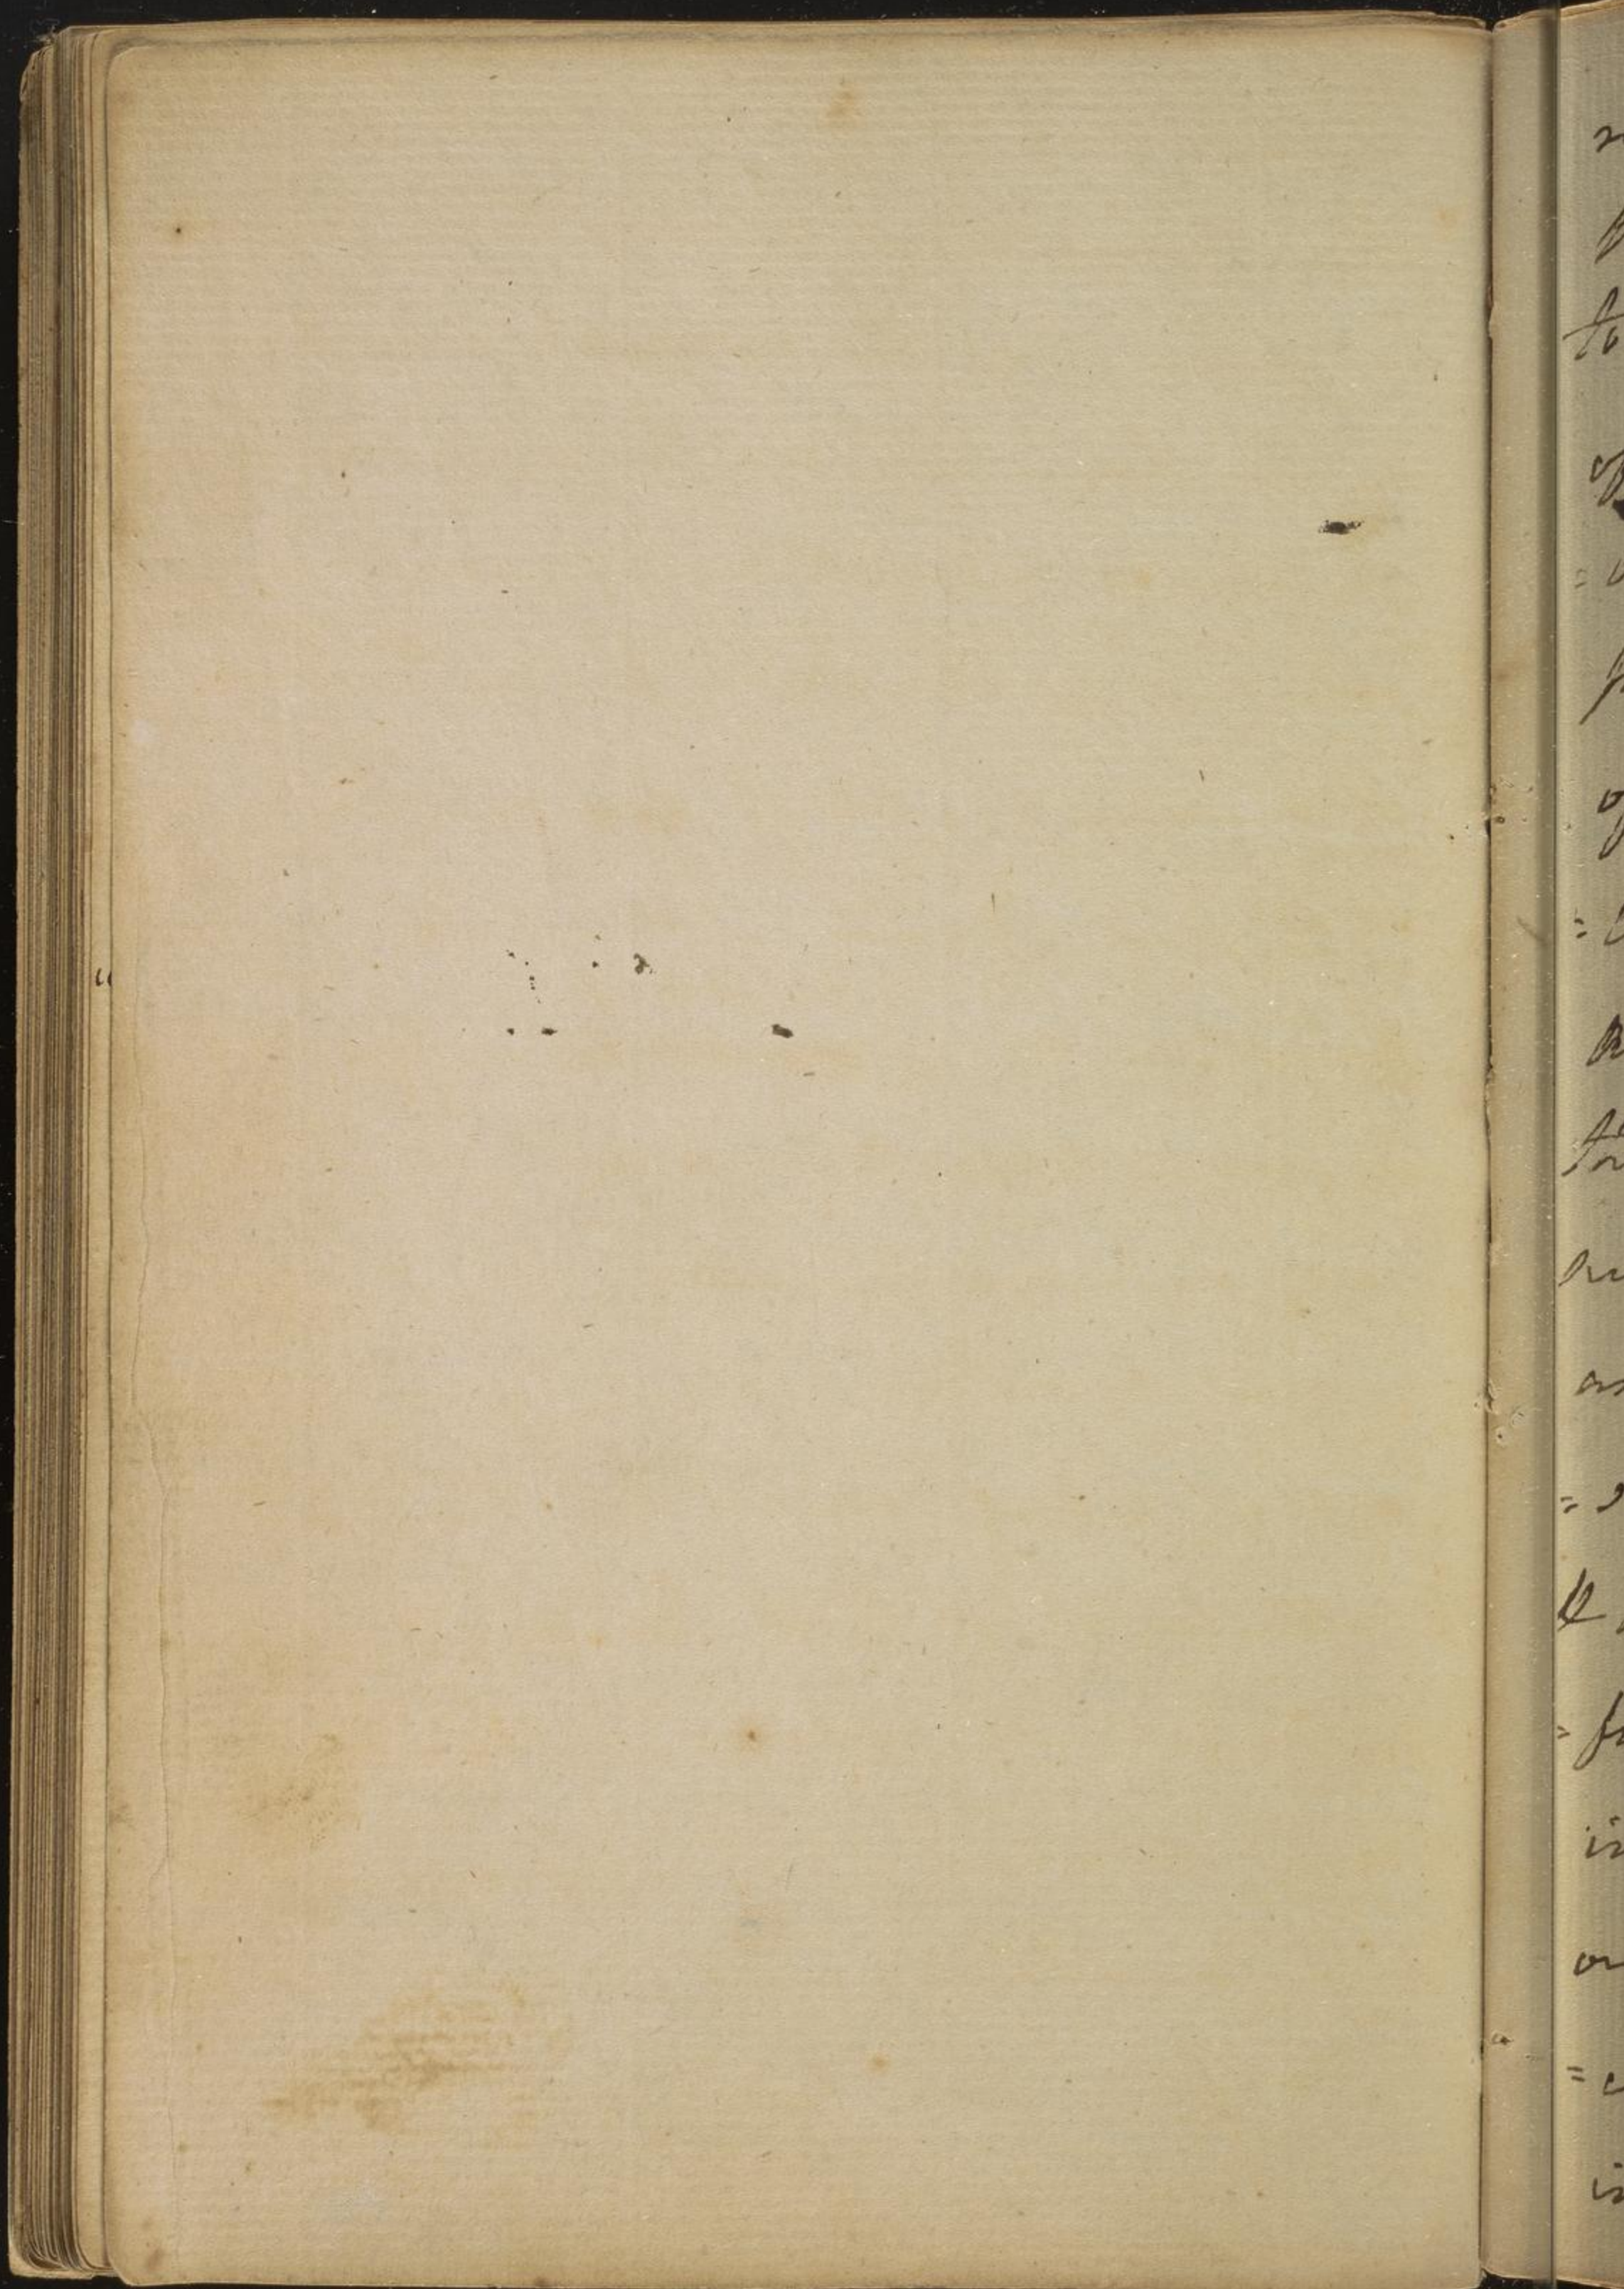

Comata -

Spasmi -

Vigil -

Crypsis

6 Fill the mind with nothing but
 useful knowledge or truth. Johnson's
 17 no ^{memorandum} ~~commonplace~~ books - anth:
 saying . . . cannot be saturated. Is
 Buxton's remark on failure of memory +
 strengthened by use. See the powers of the
 body multiplied & expanded in turn-
 = bers - why not y^e same in memory.
 Another - nothing lost - proved by
 the facts of the fountains of Laval, and
 Dr Rutherford - said by a thousand
 things awakened in old age by acci-
 = dents, & aspiration. - How much
 should this encourage us in acquiring
 knowledge! And how careful should
 it make us what kind of ideas we
 treasure up in our minds - In the
 former case we can lose - in
 the latter forget nothing. But One
 more that upon this subject. If
 every idea we acquire is to be retained
 and if our powers of acquiring, &c.

retaining ideas increase with
 the number of ^{our} ideas, then figure
 to yourselves the extent & treasures
 of the human mind after the revo-
 lution of a million of years in the
 presence of the Deity & in the society
 of innumerable & ~~his~~ equally in-
 telligent Spirits with itself! — no
 Arithmetic is ^{capable of} ~~capable of~~ calculating
 the knowledge to be acquired under
 such circumstances. — But let us
 ascend one step higher — and ask our-
 selves what must be the nature
 & attributes of that Being, whose per-
 fections will appear unsearchable
 in proportion to the expansion of
 our faculties, and who will re-
 ceede from our comprehension
 in proportion to the growth of our

[Faint, illegible handwriting on a single page of aged paper. The text is mirrored across the page, suggesting bleed-through from the reverse side.]

[Faint, illegible handwriting on the right edge of the page, likely from the reverse side.]

powers, and the degrees of knowledge
throughout the immeasurable ages
of eternity — the

idea is too big for expression — and

the human mind sinks under
a sense of its ^{infinite} magnitude. [It was

probably under this view of the

value of ~~our~~ ^{the} human soul that

~~the~~ ^{our} saviour ~~of the world~~ pronounced

it of more value than the whole

material world! — Under this view

of the soul, we may ^{address it} ~~say to it~~ with

reverence, as ^{David} ~~the inspired writer~~ does the

by saying, "The earth shall perish
deity, the heavens shall wax old like
garment, but they shall endure — they shall

a garment, but the soul with all

as a vesture they shall be
its growing form shall endure for

~~ever~~ ~~never~~ changed, but thou

art the same, & thy years shall
have no end" Psalm 102-26

+ common ~~for~~ⁱⁿ England - Drives to
Suicide - produced by causes physi:
- cal & moral - as too much animal
food - strong malt liquors - damp air -
education in solitary rooms in colleges
& schools - ~~being~~ seeing executions &
tragedies. -

melancholia - +

1 Species - melancholia religiosa.

Here remark 1st The Spirit of God acts on y^e human mind, but inspires it with truth only. Every idea contrary to this as revealed in the Scripture is a disease. Such as 1 reprobation - not true - nor revealed. 2 The commission of the unpardonable sin. Not known what it is - doubtful whether it can be committed. Never committed by any person who is afraid of having committed it. 3 The outliving the day of Grace - equally Unknown how long the cure

1 But: if plethora attends. 2 purges

+ Excess of joy as well as grief produces
madness. ~~See~~ South Sea bubble - Mead's
fact - Lord Cornbury - Mrs Mollineaux
- Mr Lynch married wid^d Martin - a poor
young man - rich widows - - Delirium &
mania distinguished by the pulse - no
quickness in the former - in the latter
quick. - Dr Stark dissected a brain
^{after death}
from mania & found no disease
there. Death was from sudden
loss of excitement.

3 Vomits - 4 Business - 5 exercise -
long journeys - 6 a salivation &
cheerful company.

Ornamentaria -

curae

1 Blisters &c. - The prince of Conti
& A: M'Henry's cases. 2 Absence -
3 Binam American of Ovid 4 & a
lady sings or plays on a musical in-
strument disagreeably, to oblige her
to do both in order to disgust.

no hope -

Morbid +

Different degrees according as Indig:
ment - memory - & moral faculty
are suspended. Is hereditary. A
remarkable speech of Gen^l Montgomery.
:rys. Four causes in our hospital
known - Love - grief - religion
& Spiritu^{al} ^{liquors} ^{half} ^{one} from the
last cause. +

+ Constant exercise of the brain on
one subject produces the same torpor
ⁱⁿ writing too long produces in the
right hand. Extend the number
of cases of false perception - to 900
- relate the - Copr: sense w: ?
11 Reading stupid books. Brown
12 Cold Bath long ino nearly to
kill D.

+ See Dr. Willis' ~~case~~ Prognosis of
Grose 3^d case in a news paper -
presumed to be. Dr. Baker pronounced
~~the~~ the King's recovery certain, as soon
as he recovered his former rapid habit of
speaking. See Sydenham ^{70 &} p. 71 - Mad:
- raps from Astoria cured by ferals
Dr. A. Fothergill - raps cured 4.
Madness seldom cured - cured
two cases by Hyoscinum.

Two general Species. Tonic
 & Atonic⁺ - or melancholly &
 raving madness of authors.

Cure of tonic

- 1 V.S. ad deliquium. 2 purges. 3 V.S.
- 4 vomits. 4 Blisters. 5 The clay cap
 or cold vinegar to the naked head.
- 6 labor - Dr Gregory's fast - any
 thing w: will ⁱⁿ fatigue. 7 low diet.
- 8 ~~warm~~ ^{below 96°} bath. 9 confinement.
- 10 music & sleep case - negative tones 11 -
~~to 100 years~~. Cure of Atonic +

1 Blisters as Stimulants 2 Vomits
 but chiefly 3 exercise & such things
 as rouse the system. Helmont's
 feat of half drowning - confirmed
 by Carvers of the Indian midwife
 so as to produce convulsion &
 violent exertion. The hot & cold
 bath in succession - 4 pure
 Air - ~~not~~ no cells. Here I add

O Dr Swift had a temporary return
of his reason from a large Abscess ⁱⁿ
his eye. Dr Johnson. Is it the
pain does good ~~you~~ here? If so -
would not artificial pain do service?
+ Dr Hunter cures madness by
gentleness - enjoining madness w:
his family &c. good! -

After treating of the disorders
of the ~~passions~~ ^{Understanding} next of the
Passions - Fear - Grief - Lust
Lust ⁱⁿ Lust is cured by Dr Stark by a diet of
bread & water - increased by a
milk diet - & still more by C, or S
courses of roasted goose every day.
is increased by indolence - as in
1. Cities of the plain. 2 in monks.
3 Hippocrit: ^{as} 3 weavers - women
+ forbidden to weave on y^e festivals

a few facts. A *Typhus* once
 cured most of the maniacs in our
 hospital - one in *India* did the same.
 Donquiasotti rec^d in his last sickness -
 three instances of large abscesses the
 same - many had to important
 conclusions. - Black Sam's case -

came to his senses three days before he
 died. Had an abscess in his side. Dr. Smith
 treated by pressing the carotids. + 5 Opium
 6 Lody. Dr. Smith's case. 7 strong passions
 from excessive dreaming, & might

walking prevented¹² by previous
 labor 2 By avoiding heavy suppers,
 & when in the habit of supping, by
 avoiding going to bed empty. -
 perhaps by anodynes. Incubus
 prevented by lying on the side.

Castro

Ship Alliance's Material

For approved Notes at 60, 90, and 120 Days, viz.

All her Sails

One small Anchor of about 800 weight

One do do. 400 do.

One Cable 68 fathoms

One 7 1/2 inch Hawser, 90 fathoms

One 5 inch Towline, 8 do.

One small Rope. 40 do. &c. &c.

Dec. 22. dit

John Patton, Auctioneer.

N. B. The above was to have been sold on Monday last, but the badness of the weather prevented it.

To be Sold by Public Vendue,

At the Merchants Coffee House, in the city of New-York, on the 4th day of May next, or at Private Sale at any time before that day.

A Valuable TRACT of LAND,

Ten Miles Square, containing 64,000 Acres, bounded in part by the river St. Lawrence, nearly opposite the British settlement of New Johns town; this Tract is advantageously situated, well watered and timbered, and of an excellent soil, and will be sold in lots, as may be most convenient for the purchasers.

For further particulars enquire of Mr. Robert Gilchrist in New York; Mr. James Dunlap at Montreal; Peter W. Yates, Esquire at Albany; Captain John Duncan at the Hermitage, near Shenecady, or to the Subscriber in Philadelphia.

EDWARD FOX,

N. B. All kinds of Public Securities will be taken in payment for the above Land, and a generous price allowed for the same.

Vendue Sales

At Elijah Weed's Ferry,

OVER SCHUYLKILL.

THE subscriber having met with success in effecting his Vendue Sales, is now prepared to sell any and all property.
